

Weigl GmbH & Co KG is known around the world as the brand **Weigl Control**, which stands for individual solutions in Show Control.

Weigl Control provides interactive and multi-media electronic controllers for [theme parks](#), [sauna & spas](#), [animatronics](#), [targeting systems](#), [science centers](#), [haunted houses](#), [theaters](#) and [museums](#).

The [Weigl ProCommander® X Series](#) was developed in celebration of our 10th company anniversary, which expands the functionality of the [ProCommander® Series](#) with polyphony, advanced networking and digital motor control.

The [Weigl Procommander® Series](#) features solid-state show controllers built for playback of synchronous audio, video, animation, lighting, and mechanical action. The controllers' flexible architecture options and open control protocols allow inspired attractions to be designed without hardware limitations.

The modules of the [Weigl Pro I/O™ Series](#) are used either for expanding installation requirements of show control units of the [ProCommander® Series](#) or as interface between computer and external show control equipment.

The [Weigl PrismTag™ System](#) is an interactive gaming logic, which illustrates the possibility of visitor-related scoring and resulting high score graphically processed. For generating direct player reactions or triggering special effects it interacts in a very flexible way with our [ProCommander®](#) and [Pro I/O™ Series](#) devices.
